of the instructions for the manifest. I want to know what the instructions are that helps the browser to understand how to interact with the web app A: You can find a list of the MIME type and description of the different image formats here: And the full list of supported subtype here: Another way to think about it is that any file under extensions and contained can be handled by the browser. But there are restrictions on the types of files that can be opened in the browser. You can find the list of supported extensions in this document: You can find the list of MIME types here: The list of restrictions and descriptions of each type on the web are here: The list of allowed properties is here:
