The second goal is to provide a detailed understanding of the regulation and functions of the polyamine metabolic system in hematopoietic cells. During the next period of support, additional work will be initiated on: 1) regulation of the polyamine metabolic system in hematopoietic cells; 2) biosynthesis of the polyamines; 3) purification of the spermine synthase; and 4) purification of the ornithine decarboxylase. In addition, a working model for the regulation of putrescine biosynthesis and flow of the polyamines will be developed./* * /MathJax/jax/output/HTML-CSS/fonts/STIX/General/Regular/IndicMathematicalSymbols.js * * Copyright (c) 2009-2014 The MathJax Consortium * * Licensed under the Apache License, Version 2.0 (the "License"); * you may not use this file except in compliance with the License. * You may obtain a copy of
