# NewBlueFX Bundle 3.0 Patch Build 121206

[Download](Download)

FalseAdded New BlueFX DSP 4.5.4 New BlueFX 4.5.3 is available now! The full list of changes is at the bottom of this article. Added New BlueFX DSP 4.5.4 Made several minor adjustments to the UI We've added DSP 4.5.4, which is a compatibility patch for DSP 4.5.3. It brings the following features: Read more about the installation here: Download BlueFX 4.5.4 Made several minor adjustments to the UI Updated the icons for the Volume LED device and the BlueFX EQ device The updated icons will be available in the next version of BlueFX Bundle. Added New BlueFX XB File to the BlueFX Files menu We've added the New BlueFX XB file, which is an application that simulates the factory-preset New BlueFX XB's. This is perfect for someone who wants to experience the sound of the XB, without spending too much time (and money) on presets. Download New BlueFX XB New BlueFX XB device not available for Windows 8. Fixed issues with setting the proper default device for the Spire device The Spire device has been added to the OSD and the waveform and level meters. The default device was not being set properly, resulting in weird readings and inaccurate meters. We've fixed this. The Spire device can also be set to use a custom device, if desired. Download New BlueFX Spire Added an OLED Display option to the network settings We've added an option to change the default device to OLED, for use with the Spire device, and the BlueFX Network. This feature will only be available on select devices. Additional GUI Changes Added new device: De-Esser We've added a new device: the De-Esser. It's a digital hardware de-esser based on the ELDT-50. It has eight adjustable filter bands, a tap tempo setting (labeled as "Taper") and a "Clean" mode, and it has MIDI learn functionality. It should be noted that BlueFX users can use this device as a low-pass filter to reduce rumble, hum, and white noise. How does the De-Esser work? When set to "Low Pass" and set to "Enabled", it performs a digital low-pass filter on the signal. The cutoff frequency and roll-off can be adjusted. When set to "Clean", the De-Esser removes certain frequencies from the signal. It�
